Applicant's election with traverse of Claims 3-5 in the reply filed on 2/27/09 is acknowledged. Although not fully in coherent English, the traversal seems to be on the ground(s) that the toy balloon could not be manufactured using any other method or accessory. This is not found persuasive because it appears that the balloon could be manufactured by hand, and consideration of the claimed accessory and method would require substantial additional examination.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1 & 2 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/27/09.

Claim 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to earlier claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

\* \* \* \* \*

Claims 3 & 4 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a

manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3 & 4 are rejected under 35 U.S.C. 102(b) as being anticipated by D'Este et al 1,899,892.

D'Este shows a package that could function as a toy balloon, including a tubular body having overlapped ends fastened by adhesive tape.
